

Israel Shipyards Environmental Policy

The environmental policy refers to all areas within the factory and to the overall products manufactured within it.

Israel Shipyards Management believes in the value of promoting social responsibility and sustainable values, recognizing the vital importance of preserving the environmental quality for the existence of the factory and its competitiveness.

It establishes an environmental quality policy and objectives to support its plans and initiates and promotes processes for improvement.

Management is committed to acting in accordance with environmental quality principles:

Compliance with laws, regulations, standards, and other requirements related to environmental protection. Minimization, with the aspiration of prevention, of environmental pollution resulting from the company's activities, and protection of natural resources, the environment, and the community, for the mutual benefit of all stakeholders and future generations.

Conducting management surveys and setting annual goals for continuous improvement of the environmental management system, its adaptation, and efficiency.

Ensuring the availability of resources necessary for the management and control of the management system and the training of human resources.

Eitan Zucker,

Israel Shipyards CEO
